

FORGOTTEN AIRFIELDS OF THE WORLD...PART I

By
Gera Godoy Canova

Around the world there are many airports and airfields that were useful at a given time but due to economics, weather, and thousands of other reason were abandoned to their faith. Some are still used by small clubs and others are being eaten by grass and mud as you read this.....

Finding these airfields and airports is not very easy, most of them do not have a MAP location anymore and those that are marked in maps are rare. So flying out to them is a question of knowing how to navigate BY FOLLOWING A GIVEN BEARING AND KNOWING ITS DISTANCE FROM SOME OTHER PLACE...This is how you will fly and complete these flights...HAVE A GOOD TIME.

ALASKA BORDER TOWN AIRFIELD.....Built in 1942, a border patrol
airfield.

An airfield located in the State of Alaska near the Canadian border. It was used by the Border Patrol 32 Squadron as a base where its planes were serviced during WW2.

Now the airfield and town are only Ghosts!!!! it is possible to land in it but care must be used since some crashed planes were left around the field.

Start at VEE, Venetie and fly a course of 36 degrees for a distance of 106 NM
USE THE ENCLOSED MAP. (Calculate ETA according to the aircraft's Speed)

USE FLIGHT:.....ON THE THE BORDER

MAKE SURE YOU HAVE FULL TANKS THERE ARE NO
FACILITIES HERE AT ALL....

Bring water and food and a tent if you plan to stay overnight!!!

BORSKY TOWNSHIP, RUSSIA....BIRTHPLACE OF IGOR KIRSKY

This was the town where canned foods were processed during
the Afganistan war that the Russian army fought for
so many years to finally get the hell out of there with no
results.

COLD OUT HERE!!! SO TAKE SOME WARM CLOTHES
NO GAS, NO NOTHING....

START AT UUEE, YAKUTSK and fly a course of 103* for a distance of 183 NM
Calculate ETA

USE FLIGHT: FSADVENTURESKY TO BORSKY

ISLA PULGA, CHILE

This airfield was used during the Chilean expedition to Antartica in 1952 when the whole expedition was lost never to be see again!!! The incident caused the closing of the field at that time. It is located on a shallow hill so you might land going up.....

weather here is really cold

USE FLIGHT:.....TO ISLA PULGA

Hope you enjoy the flights, soon PART II
