CYCD (2011) - VERSION HISTORY

1.00   (July 2011) - Initial general release

1.10   (August 2011) - Resolves the following issues:
- autogen at the north end of the populated area west of the airport suppressed (FSX only)
- road/railroad textures for use with ORBX PNW omitted in the initial release
- a faulty obj_FuelTrigger.bgl file caused magnetic variation to be ignored (at CYCD and all other FS9 airports)
- a small, non-existent cliff appeared west of the golf course (FSX only)
- localizer and glide slope antennas included
- extra fence segment just south of runway removed
