

# MASHARA....DOOR TO THE FUTURE

## FSX Adventure Flight

By Gera Godoy Canova

---

In 1947 the temple and sorroundings of Mashara were discovered in the valley of Markusma, district of Burgassa in Mongolia. Since then a continues crowd of scientists of all kinds have been studying without finding what it is all about, until yesterday.

As Dr. Emer Guttzman and Farina Megelmer were verifying some of the mysterious fog around 2:35 pm local time, a bluish light covered them and both vanished and have not been found since. Dr. Berthen Amudsenhud, the Swede, thinks that the vanishing of his peers "proves" that the temple is really a "DOOR TO ANOTHER DIMENSION" that it is a door to the future!!!! as you might guess.....all hell has broken loose.....

## **TWO WEEKS LATER:**

As pilot of Gangar Air Service you have been hired by the Bulag Scientific Group to transfer twelve of the museum scientists to the Mashara Site. You will take off from HANH and fly these people to what is now called the "door". They will gather some strange artifacts that emanate bluish light and fly them to a special plane at the airport of MUREN. You then will transfer to the mentioned aircraft and fly them to BISHKEK, where your pay check is waiting for you....Choose your aircraft carefully and look at the gasoline indicators with care.
