

# SimHangar's Łososina Dolna X

## For the Microsoft Flight Simulator X

Thank you for downloading EPNL X! We hope that you will enjoy the scenery and it's beautiful countryside.

The scenery was done with FSX Acceleration SDK, so it will run in the Dx10 mode without any problems. The scenery contains 1m/pix photo texture with seasonal and night variations and custom buildings.

The 3D objects were done in Wings 3D freeware 3D software and then exported to Gmax. Aerodrome's photo texture was done in the Sbuilder X. Scenery objects were compiled in the LibraryCreator XML and then placed in the Whisplacer 0.9. Aerodrome characteristics were done in the ADE 1.37.

### Aerodrome characteristics:

The aerodrome in Łososina Dolna was built in the 1960 and it is a home of the [Podhalanski Flying Club \(Aeroklub Podhalański\)](#). The local Flying Club organizes flying courses (gliders and GA planes).

- ICAO Code - EPNL
- Geo. Location: 49° 44' 43.95" N, 020° 37' 24.75" E
- Airspace class: G, ATZ
- Frequency: 122.200 MHz
- Altitude: 254 AMSL
- Hdg and distance from Nowy Sącz: 14.5 km (7.8 NM), 340 HDG
- Traffic: VFR
- Approach lights and runway lights: none
- Runway: 043/223 HDG, 800 x 150 m, Grass airstrip
- Available fuel: Avgas 100LL

## Installation:

Simply, copy the EPNL\_X folder into your Flight Simulator/Addon Scenery folder. Then, run the FSX and add the scenery via Library Manager. The ICAO code for the scenery is EPNL.

## Copyright:

The scenery is freeware and shall not be sold or published on the CD ROM/ DVD ROM packages without a permission of the original authors. All copyrights belong to Łukasz Kubacki and Michał Krawczyk.

## Credits:

Łukasz „Lucas” Kubacki – scenery design, textures

Michał „Some1” Krawczyk – TS-11 Iskra static model

Marcin „Kapulet” Kapturkiewicz – photos of the original aerodrome in Łososina Dolna
