

FS2004 AFCAD File for ETNH (Hohn Air Base) by Michael Gurezka, May 2011

This is an AFCAD file for Hohn Air Base (ETNH) in Germany.

For use with the FS2004 default scenery. Apron and taxiway layout edited according to GoogleEarth images.

Air base has 21 parking positions for transport aircraft and 8 parking positions for combat aircraft.

Hohn is the home of the German Air Force's Lufttransportgeschwader 63 (Air Transport Wing) and home for their C-160 Transall transports.

Created with AFCAD 2.21 by Lee Swordy.

Remarks:

Here and then you will find taxiway signs in the „wrong“ places. These are the taxiway signs from the default scenery which cannot be removed/corrected with AFCAD 2.21. In order to not confuse you even more, this AFCAD file does not use taxiway designators. Taxi instructions from ATC will always be just „to (gate/runway) via taxiway“.

Installation:

From the unzipped package copy/paste or move the file

AF2_MG_ETNH_Hohn-AFB.bgl

to your FS2004\Addon Scenery\scenery directory. Make sure that addon sceneries are enabled.

Recommendation:

This is a large airport and it is recommended to increase the default ground speeds of AI aircraft using a suitable editing tool, e.g. Wolfgang Picheta's FlusiFix.
