

ROBIN DR400 / 180

FOR FS2004

This aircraft is a repainted from an original model by Yannick Lavigne and a modified mdl file for use with FS2004.

The panel is an original model, with Pedestal, and moving yoke, also a seat which allows to have a better view over the panel. All the gauges are functional.

For more informations, see the Panel.htm, attached in the aircraft folder.

INSTALLATION

Just unzip the folder FJLDR400.ZIP into you fs9 folder. Start FS2004 and check for ROBIN into the aircraft list.
