## Introduction

Flight simulation has new breakthroughs and achievements every day. This digital magazine has been created to highlight these in a colorful and entertaining way.

Nicholas LaFrazia

*About Cover Picture:*

**This issue was assembled in a hurry for our September deadline so we used a picture from our collection.**

## AVSIM has "Oops"

Many of you probably attempted to Access the file library at AVSIM but weren't successful. AVSI has posted a description of what happened along with the next day's files.

"Our Server had a little "oops" on Sunday, but it's back and ready for some more! Check out all of Monday's files, ready for you now at the gate! You can download these files from the links below, or visit the entire **AVSIM Library**."

# The Free-Ware Comet

---

*From DM Flight Sim*

<http://www.dmflightsim.co.uk/>

## **DM Flight Sim released is COMET update on August 27<sup>th</sup>.**

DM flight sim is a great freeware developer; their aircraft are of excellent quality. They recently released updates for their comet including a new awesome VC. Here are some pictures they have on their site.

They have many other excellent aircraft and panels available. And is, in my opinion, one of the best freeware historical aircraft designers.

## Free-Ware Corner

---

*Handy Freeware add-ons, programs, and aircraft that you never knew you needed.*

### **Lumberjack**

A great add-on by Jim Keir. It removes annoying trees from the ends of runways in FSX.

### **Swiss Canyon Glider Ramp**

A challenging series of elevated runways for glider flights in FS2004.

*Since this is a time-rushed issue there will be more content in later issues.*

## Flight of the Month

---

*Cozumel to Corpus Christi*

MMCZ -KCRP

Any aircraft of your choice.

**Submit pictures and a story of your flight to [planeprogramer@gmail.com](mailto:planeprogramer@gmail.com) and it could be featured in next month's magazine!**

## Wanted!

If you have a story that you would like to have featured or a freeware item that you would like reviewed or discussed please send it in an E-Mail to [planeprogramer@gmail.com](mailto:planeprogramer@gmail.com)
