GOOGLE FLIGHT SIMULATOR!

SPECIAL EDITION!

GOOGLE DEVELOPS FLIGHT SIMULATOR!

Next Month Preview!

And more…

$0.00

Introduction

Flight simulation has new breakthroughs and achievements every day. This digital magazine has been created to highlight these in a colorful and entertaining way.

Nicholas LaFrazia

About Cover Picture:

A picture of being lined up for takeoff at London Heathrow from the Google Earth Simulator.

Google Earth Flight Simulator

Google Earth Version 4.2 has a flight simulator in it, as most of you probably know by the time this is published. To launch it go to the GE tools menu and click enter flight simulator, or use the key shortcut Ctrl-Alt-A. You may wish to read more about how to get great features out of it and info from Google on it later in this magazine.

Google's New Flight Simulator!

Scenery

3D buildings are viewable in this simulator, so we decided to make a large area of detailed scenery for it around KLAX. Help is needed as this is a very large area. For more info on our KLAX scenery go to: http://sketchup.google.com/3dwarehouse/cldetails?mid=da8b32507a949d74651c1c5c2b3fbf17

Aircraft

So far there are only two aircraft with no outside views. We would eventually like to see outside views with user designed aircraft made in scketchup. Then it would truly be a great community flight sim with even novice developers creating overlays, buildings, and aircraft all available from one centralized site.

Interview

This isn't much of an interview but we contacted Google and these are there direct quotes to us:
"Thanks for your note. The Google Earth Flight Simulator was released on August 22nd. Unfortunately we do not have forward-looking plans to share at this time."

Free-Ware Corner

Handy Freeware add-ons, programs, and aircraft that you never knew you needed.

Cessna 150

One of the best freeware aircraft I have ever encountered, this aircraft has an extremely realistic virtual cockpit and a screen with many options such as removing wheel covers. This aircraft is great if you are training in the 150. Couldn't be more realistic unless you had a force feed-back yoke.
http://drk.free.fr/tutoriels/index_en.php

Oz-Pilot

An application providing charts, freq. and other information for controlling agencies in New Zealand and Australian Airspace. http://library.avsim.net/sendfile.php?Location=AVSIM&Proto=ftp&DLID=109191

Flight of the Month

Grove to Pearson

1W1-KVUO

Aircraft: Cessna 150 Commuter

Submit pictures and a story of your flight to planeprogramer@gmail.com and it could be featured in next month's magazine!

Last Month's Flight

Thanks to Paul who submitted these pictures.

It appears that Paul used the default Lear 45. He submitted these pictures of his flight.

Nice shot of the winglet.

Wanted!

If you have a story that you would like to have featured or a freeware item that you would like reviewed or discussed please send it in an E-Mail to planeprogramer@gmail.com
