# FS Scenery Manager V1.3

1. INTRODUCTION

FS Scenery Manager is a little tool to manage easily sceneries of FS2004.

The main particularity is the possibility to classify scenery into folder, for a simplified management of several sceneries in one click.

The scenery.cfg file is found automatically using the registry base.

If the registry base is corrupted, a dialog box asks you the path of you Flight Simulator 2004.

However, the best is to correct the registry base using the FS9 path utility of TweakFS :

To add a folder, click on the [New folder] button and enter the name of the folder

Name	✕
Name [ ]	
	[OK] [Cancel]

Now you can add scenery to this folder: select the folder in the right tree, select a scenery in the left list then click on the ➡ button (or double click on the scenery line) to link the scenery to the folder.
Remark: A scenery can be added to only one folder.

When a scenery is linked to a folder a little blue circle appears near the name of the scenery. It is useful to known if the scenery is already used in a folder.

Moreover, when you select a folder, the circle is filled for all the scenery of this folder.

To remove scenery to a folder, just select the scenery and click on the ⬅ button.

5. GENERAL PART

[Save] : save scenery.cfg and the folder.txt file which is located in the main FS folder. The "folder.txt" file contains the link between folder and scenery.
