Radius	Gate Type	AI Aircraft Type	WingSpan
10.00	Ramp GA Small	General Aviation Single Prop Aircraft	
14.00	Ramp GA Medium	General Aviation Multi Prop Aircraft	
15.00		CRJ Do328Jet ERJ Yak40	70 / 67 to 86 / 115 ft
16.00		Regional Turboprop Aircraft	max 101 ft
17.00		Cargo Aircraft Regional	
18.00	Ramp GA Large	Regional Aircraft Overflow General Aviation Jet Aircraft	
20.00	Dock GA	Amphibious Aircraft	
21.00		B717 BAC 1-11 BAe146 ¹ F28 ¹	94 / 86 / 82 ft
22.00		A318 A319 A320 B727 DC9-Series F70 F100 Tu134	112 / 92 to 111 ft
23.00		B737-Series	93 / 113 / 118 ft
24.00		A321 MD80-Series MD90 Tu154	112 / 108 / 123 ft
25.00		B757-Series IL62 Tu204 Tu214	125 / 142 / 137 ft
26.00	Ramp Mil Combat	Military Combat & Trainer Aircraft	
29.00		BBJ Boeing Business Jet ²	118 ft
30.00		Cargo Aircraft Narrow Bodies ²	
31.00	Gate Small	Gate Small Aircraft Overflow	
32.00		A310-Series DC8-Series	144 / 149 ft
33.00		A300-Series	147 ft
34.00		B707-Series	146 ft
35.00		B767-Series	156 / 171 ft
37.00		B787-Series ²	170 / 198 / 204 ft
38.00	Gate Medium	Gate Medium Aircraft Overflow	
39.00		MD11 DC10 IL86 IL96 L-1011	169 / 155 to 198 ft
40.00		A330-Series A350-Series ²	198 / 210 ft
41.00		B777-Series	200 / 213 ft
42.00		A340-Series	198 / 208 ft
43.00		B747-Series	196 / 211 / 225 ft
44.00	Ramp Mil Cargo	Military Cargo & Bomber Aircraft	
45.00		A380 ²	261 ft
50.00	Ramp Cargo	Cargo Aircraft Wide Bodies	
54.00	Gate Heavy	Gate Heavy Aircraft Overflow	

Changes To Official 'PAI Recommended Aircraft Model Radius' Settings : ¹ = radius changed ² = aircraft added

How To Radius A Model

1. Use the latest version of AITM for FS2004
2. Press "F6" to open the Aircraft Editor
3. Select the model you want to give a new radius
4. Type aircraft model radius to field "Radius (m)"
5. Move cursor to field "Model"
6. Don't make changes to field "Model" if your aircraft is non cargo otherwise write / add "cargo"
7. Click "Save" to save your changes

Einen Model Radius Ändern

1. Benutze die neueste Version des AITM für FS2004
2. Drücke "F6" um den Aircraft Editor zu öffnen
3. Wähle das mit neuem Radius auszustattende Model aus
4. Schreibe den Radius in das Feld "Radius (m)"
5. Bewege den Cursor ins Feld "Model"
6. Wenn es kein Frachtflugzeug ist, im Feld "Model" keine Änderungen vornehmen, ansonsten "cargo" ein- bzw. anfügen
7. Klicke "Save" zum Speichern der Änderungen
