APU OFF
Battery OFF

A few explanations...

The “Quick and Easy”-checklist has some bold printed lines. If you like to go through the checklist as fast as possible you may execute only these lines - quick, but not very professional.

The “Quick and Easy”-checklist can also be used with the panel status “After Engine Start” beginning with the “Taxi Procedure”. But previously you should complete it with all lines showing a + or ++. The ++ means this one and the following.

► This symbol indicates always a condition: if / then do the following.

AIR, ELEC, FUEL, HYD within the headlines of this Normal Checklist have to be checked as well.

Abbreviations:

CHK	Check
CKD	Checked
DISC	Discontinuity
DISCT	Disconnect
EXEC	Execute
EXT	Exterior
EXTD	Extinguished
GUARD	Guarded
LT	Light
LTS	Lights
PERF	Perform
RCV	Receive
RCVD	Received
REQ	Required
RET	Retract(ed)
SW	Switch
SWS	Switches
