

Oceano County Airport (2Q5)

Oceano, California
For FS2004

Info: Oceano County Airport is a publicly owned airport on the central coast of California in the city of Oceano. The airport caters mostly to General Aviation activity as there is no FBO. Commercial activity consists of Banner Airways, who offers airplane rides in a Stearman and North American Texan (www.bannerairways.net). Facilities on the field are rather limited, consisting of a row of mismatched GA hangers along with the self-serve fuel-pump and airport office. The runway is rather short at 2325 feet, so take care that you don't overshoot. Ultralights also operate out of the field and facilities for such are located south of the runway. Surrounding the airfield are dense neighborhoods of beach homes, so for runway 29 takeoffs, pilots are directed to maintain runway heading until they reach the shore line to avoid disturbances.
