

Scenery Tempelhof 2.x
for FS2004

1. How to install
2. System Requirements
3. Settings
4. Information
5. Credits

How to install

It's really easy, just start the SceneryTempelhof2x.exe !
But be sure where your FS2004 Addon Scenery direction is.
Than the install programm will do all for you.

System Requirements

at least:
FS2004
1GB RAM
40MB hard drive
2GHz Prcessor

Settings

It can be useful to set the FS at all sections to very dense or extremly dense,
so all objects will have there place.
