

Cessna 152-F.txt

JULY 2020

Just Flight Cessna 152-F, released as freeware back in 2008. This is the complete model from the Just Flight Flying Club package updated for FSX. I have painted it as G-BLAX circa 2002 based at Bournemouth Flying Club. I did my first solo in this aircraft in 1987 when it was in its previous red and white colour scheme, and it is great to see it still around as late as 2008, but sadly, it would appear to have been de-registered now.

I have checked all the relevant documentaion and can find nothing that forbids this freeware model to be uploaded, providing the copyright restrictions are met. I am sure that if I am wrong, somebody will let me know, and if that is the case, I apologise in advance to all injured parties.

Cessna 152-F.txt
Cessna 152-F.pdf
File_ID.diz

=====

Install:

Easiest way I find, is to extract "Cessna-152F_Just Flight Freeware.zip" to a temporary folder on your desktop, and then either install the "Just Flight C152-F.zip" directly to FSX/SimObjects/Airplanes, or alternatively, extract and install manually, whichever is best for you. Aircraft will be found as "Cessna C152 G-BLAX", and you will need to allow the Just Flight gauges when you first load the aircraft.
