

## **CYCD (2012) - VERSION HISTORY**

- 1.00 (July 2011) - Initial general release
- 1.10 (August 2011) - Resolves the following issues:
  - autogen at the north end of the populated area west of the airport suppressed (FSX only)
  - road/railroad textures for use with ORBX PNW omitted in the initial release
  - a faulty obj\_FuelTrigger.bgl file caused magnetic variation to be ignored (at CYCD and all other FS9 airports)
  - a small, non-existent cliff appeared west of the golf course (FSX only)
  - localizer and glide slope antennas included
  - extra fence segment just south of runway removed
- 2.00 (March 2012) - Add a number of ground polys, custom airfield lighting and Orbx PNW compatibility
- 3.02 (June 2014) - Add Prepar3d V2 compatibility, consolidate hand-crafted ground polys with ADE\_GP and convert custom airfield lighting with AFLT (updating the approach lighting for Rwy 16)
