

read me

Well it starts as always, I can't find a usable freeware airport in this case for the EDHI Hamburg Finkenwerder Airbuswerke so I'll build it myself again

Well what can I say here it is as real as possible with many details with the after a lot of work Standard Scenery built

So, of course, fly to Finkenwerder with an Airbus and leave it there in one overtake the halls, during the waiting time you take a helicopter or a vehicle and see you on the premises at

Installation:

copy the folder EDHI-Finkenwerder Scenery into the addon folder of the FSX, start the FSX Switch to settings, scenery library, add area, press OK, then you can already starting

Extras:

to be able to see people I deliver the file 3DPeople_Lib with this you can also in the Copy the addon folder and activate it in FSX as described during installation and see You people

the same applies to extra vehicles with the supplied file

ObjLib-Large-Car-Parking-FSX and you will see more vehicles

! You don't need these extras if you already have them!

Extra candy:

especially for the EDHI, I add the AI Beluga and the Airport AI Enhancer program with it you can create your own AI traffic ... more about it on my youtube channel <https://www.youtube.com/channel/UC7vHXQMa3hhU2iGtODXIkHw/videos>
