

## Read me

FSX Scenery Ednu Thannhausen is a regional airfield in Southern Germany

I have invested a lot of time in my debut work and try as well as possible to present real because my home is here I hope you like it.

explore the surroundings fly the B300 direction Augsburg with traffic (hot air balloon) and discover the pilgrimage Maria Vesperbild.

Explore the Wakepark of Thannhausen and the surrounding area to the left of the airfield.

I work on other default scenes in my environment as far as my time allows.

Should you have any problems please e-mail [jamaika@hotmail.de](mailto:jamaika@hotmail.de)

now have fun .....

### Installation:

Just copy the folder Ednu into the FSX Addon Scenery folder and start the Fsx to log in or activate the folder in the settings Scenery library and you're ready to go.

In order to see people in 3D, I have included the folder 3D People with which you can also download them from Avsim or Flightsim. If you already own it, you do not have to do anything .....

If you do not have him just copy the folder 3D People into the folder Addon Scenery and activate or log in the Scenery Library.

Tip to 3D People slide the folder down when logging in above the global scenery then the display results are best.
