

Nauen Airfield

The airfield is actually closed. Nauen was the home of some flying clubs which fought against the closure of the airfield. Unfortunately there are no more informations about the airfield.

The airfield has a runway which is about 800 meters long. The runway ends at a taxiway wich is a extented street. All other taxiways are mowed grass. In the south of the airfield you find a small place of asphalt where the fuelstation is located.

The scenery includes some libraries. Information about the libraries: [info.txt](#)

VFR-Chart (von [airports.de](#)):
