

CFM STREAK SHADOW

By Patrick Dyer

The Streak Shadow is a fantastic microlight first flown back in the 70's by the designer David Cook it is a rugged high performance aircraft and is ideal for my Farm-Strips it will also cruise at 100mph. It also has brilliant short field capabilities as proven by David when he took off from a cricket pitch. See more about it on U-Tube.

To remove the rear passenger go into AIRCRAFT-FUEL AND PAYLOAD. Change Station-2 to '0'

Dashboard layout

Installation

Insert DVD into drive and it should autorun, if not click-START-RUN-BROWSE Find and double click the .exe file.

The programme will install into the default folder for Microsoft FSX.

Start Fsx and select the aircraft of your choice.

The installation programme has been designed for Windows XP and Windows 7 basic, if you have the 64bit version of windows simply run the installation Programme on the DVD it will creat its own folders in program files\ Microsoft Games\Microsoft Flight SimulatorX\simobjects\airplanes. Using Window Explorer or similar select the CFM folder within the above and transfer it into

program files (x86)\ Microsoft Games\Microsoft Flight SimulatorX\simobjects\ airplanes. Any problems feel free to contact me.
