Project Open Sky Airbus A330-300 v2 for FS2004 and FSX.

This is a repaint of the Project Opensky A330-300 in the stunning new livery being used by Air Seychelles. This aircraft is operated by Etihad Airways on behalf of Air Seychelles.

I have found it really hard to get an exact color match as it seems to change with light variations, but I am happy that the end result is pretty close to the few available photos on the net. The main text is as close as I can get without buying the "Bliss Font", but the "creole" lettering and the name is in the correct "arid" font.

As usual just one caveat, I am still quite new to this repaint mularky, so please forgive any errors or omissions and whilst I know it is not perfect, I think it looks pretty good. The original aircraft is aliased to the the default 737 sound and panel, but I use the brilliant Ken Mitchell panel, "ab330kmp.zip" available on this site and "a330rrtr.zip" Rolls Royce Trent sounds also available here. I have tested it on my systems and it seems fine, no problems at all but as with all these complex addons it can be a bit hard on the frame rates on lower spec systems.

Install:

As this is the complete aircraft, installation is simple, I just unzip the file to a new folder on my desktop, send the aircraft to C:\Program Files\Microsoft Games\Microsoft Flight Simulator 9\Aircraft and the effects to the effects folder and away you go. I hope you enjoy flying it as much as I did painting it, quite a challenge for a newbie. My thanks also to POSKY for making such a great aircraft.
