

ENHANCED GARMIN G1000 PACKAGE

FOR

Microsoft
Flight Simulator X

MFD enhancement:

Autopilot

ADF needles

ADF settings

DME visualisation

PFD for KingAir

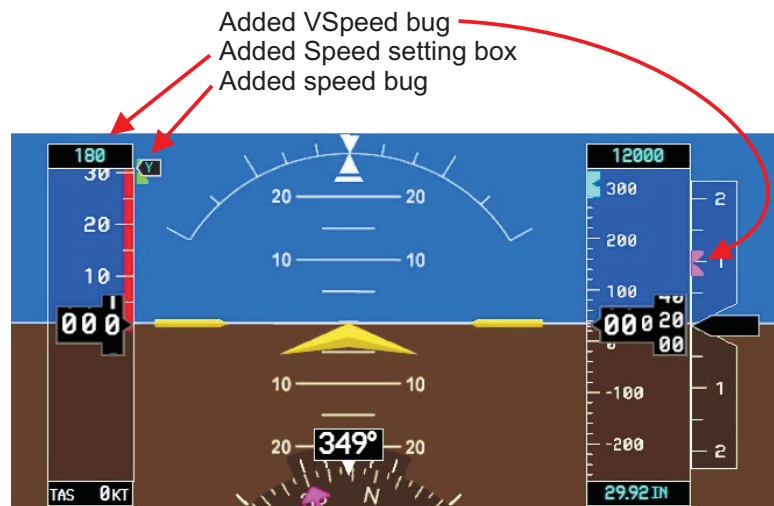

PFD without engine data

By SCUMARI Tec 2013

PFD enhancements:

When choosing a ADF active, SoftButton 2 will be set for „DIG“.
With the DIG button you can set the digits for changing the ADF frequencies.
When DIG is pressed, a marker will be visible around the first digits of the ADF frequency.
The SoftButton „ADF“ will change to „ADFINC“. Pressing will increase the digit.

Added MDF with engine data for the Beechcraft King Air

Added MDF with no engine data at all.

Have fun, Rick
