

A collection of download links of some of the aircrafts that fly in the 'Indian' airspace. (FREEWARES)

Hello friends,

I made this document so that flight simmers can easily find freeware 'Indian' aircrafts. Remember, I am not including any fictional repaints. All download links are from legitimate sources and by no means they are related to me. I may or may not update this file with time. I only take the credit for assembling these links from various websites. Hope you respect my time.

Regards,

Rishab Kumar
