

Information

New design changes almost all dialogs, icons and graphics. It should deliver better looking, clean and modern user interface. There are only a few things I decided to left unchanged and those are Missions and Learning Center tab. I believe that majority of flight simmers are using Free Flight or Multiplayer only, so I didn't want to spend another hours redesigning those parts. And they blend together with the new theme pretty well, since old theme was white/blue too. There are also some elements I couldn't manage to find so I left them unchanged. I have included a new FSX shortcut icon that matches UI theme. Tested with FSX Acceleration pack.

Installation

- First, go to your FSX root folder and copy whole **Uires** folder to safe location in case of restoration of old UI.
- Move downloaded **Uires** folder with the new theme to your FSX root folder and merge it with old one. You have to accept overwriting of all files.
- If you want a new icon for your FSX desktop shortcut, just go to its properties, click *Change Icon...*, and find an .ico file located in *Uires\Icon* folder.
